The cited documents represent the general state of the art. The invention defined in claims 1-22 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method, system and application server for supporting and transporting at least two different types of message service by a SIP message, wherein a new header or value is defined in the SIP message indicating the types of message service. Accordingly, only a single architecture is provided as a platform for different messaging types and single addressing scheme for different communication types e.g. messaging, presence, voice and gaming. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-22 is novel and is considered to involve an inventive step. The invention is industrially applicable.
